-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1. The Change of Address filed 12/20/2004 and Request for Reconsideration filed 09/07/2004 have been received and entered.

2. Following are new grounds of rejection and objections.

3. Claims 28, 37 and 40 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim.

Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s)

in proper dependent form, or rewrite the claim(s) in independent form. Claim 28

improperly depends on claim 38. Claim 37 does not identify the claim it depends on.

Claim 40 recites improper Markush Language, "selected from the group comprising". It should be "selected from the group consisting of". See MPEP 2173.05 (h).

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 25-40 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 31-36 and 39 of copending Application No. 10/922,828. Although the conflicting claims are not identical, they are not patentably distinct from each other because while the claims of the

Art Unit: 1615

10/922,828 application do not recite the weight range of domperidone and particular excipients in the compositions these differences do not constitute a patentable distinction. One skilled in the art would readily determine compatible diluents, disintegrants, granulating agents and lubricants to formulate such compositions because the use of the active agents and excipients in pharmaceutical compositions is well known in the art. The "828" application utilizes a suitable pharmaceutically acceptable carrier for a granular composition comprised of domperidone and ibuprofen that would encompass the conventional excipients of applicants". Generally differences in the amounts of agents used will not support the patentability of subject matter encompassed by the art unless there is evidence indicating such amounts are critical. "Where the general conditions of a claim are disclosed in the art, it is not inventive to discover the optimum or workable ranges by routine experimentation. *In re Aller*, 220 F.2d 454, 456, 105 USPQ 233, 235, (CCPA 1955).

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claims 25-40 are rejected.

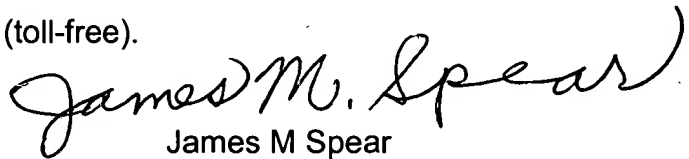

Claims 1-24 have been canceled.
